Ask patient about goals and write in HSA binder goals sheet and in patient file on first visit.

Have patient come with you to bring patient back.

Discuss the parts of the HSA binder with parent and patient. The sheet on how to make HSA for Mental Hygiene, Gender of DVC closing sheet. Explain the Activity Tracking Log to parent and patient. On that day explain and demonstrate the activity with patient then have parent practice using the HSA with patient. Show parent and patient how to log the activity in the tracking log.

Ask patient for permission to share the goals that were discussed with the parent.

Discuss with parent the area in home where patient will keep the HSA.

After setting goals decide how often HSA will be done. One session is made to have patient sign the agreement both on the goals sheet in the HSA binder and on the patient file on the hand side under the goals section. Discuss with patient and parent that by signing they are agreeing to be held to the terms of the contract and make sure that HSA is done accordingly.

Point out to parent and patient that HSA binder must be brought to every VT session and if they are to be worn during therapy. On way out of session show the parent and patient the HSA and assigned to each therapist and show them how to explain to patient that they often have to use the HSA for the copy they will put their binder and glasses case in the binder in the bin before they leave each session.
